

Reliable Bisulfite Conversion for Next-Gen Sequencing

EZ DNA Methylation-Lightning® Kits

- **Streamlined Process:** Ready-to-use conversion reagent is added directly to DNA. Purified bisulfite converted DNA in < 1.5 hours.
- **High-Quality:** Bisulfite-converted DNA has > 99.5% conversion efficiency with reduced fragmentation.
- **NGS-Ready:** Low DNA input requirement makes it ideal for preparing whole genome or targeted enrichment bisulfite libraries for methylation analysis.

Compatible with Low DNA Inputs

Whole-genome bisulfite sequencing libraries were successfully prepared from DNA inputs as low as 10 pg using the EZ DNA Methylation – Lightning® Kit. Libraries were generated using the Zymo Research Pico Methyl-Seq™ Library Prep Kit, then analyzed using the Agilent 2200 TapeStation® system.

High Conversion Efficiency

DNA with a methylated CpG (at nucleotide position 10) was processed using the EZ DNA Methylation-Lightning® Kit. The recovered DNA was amplified by PCR then sequenced. The methylated cytosine at position #10 remained intact, while the unmethylated cytosines (i.e. positions #1, 3, and 13) were converted into uracil following bisulfite treatment and detected as thymine following PCR.
