

## SECTION 1: Identification of the substance or mixture and of the supplier

GHS Product Identifier Rabbit Anti-Hamster IgG(H+L), Mouse/Rat SP ads-FITC

Other means of identification N/A
Product type Liquid
Product code 6215-02
Chemical formula Not applicable
CAS No Not applicable
SDS No. 2232098

Relevant Identified uses of the substance or mixture and uses

advised against Not applicable

Supplier's details Southern Biotechnology Associates, Inc.

160 Oxmoor Boulevard

Birmingham, Alabama 35209 USA

Tel: (205) 945-1774 Fax: (205) 945-8768

Website: www.southernbiotech.com

**Distributor and Emergency Phone** 

Refer to website for distributor and emergency phone numbers.

**No.** Tel: (205) 945-1774

# **SECTION 2: Hazards identification**

# Classification of the substance or mixture GHS-US classification

Acute Toxicity Oral - Category 5

# Label elements GHS-US labeling

Hazard pictograms (GHS-US) None

| Signal word (GHS-US)              | Warning  |  |  |  |  |  |
|-----------------------------------|--|--|--|--|--|--|
| Hazard statements (GHS-US)        | H303 – May be harmful if swallowed   |  |  |  |  |  |
| Precautionary statements (GHS-US) | P262 – Do not get in eyes, on skin, or on clothing.  |  |  |  |  |  |
| Prevention                        | P264 – Wash hands, forearms, and exposed areas thoroughly after handling.  |  |  |  |  |  |
|                                   | P270 – Do not eat, drink, or smoke when using this product.  |  |  |  |  |  |
| Response                          | P312 – Call a POISON CENTER or doctor/physician if you feel unwell.  |  |  |  |  |  |
| Storage                           | Not applicable   |  |  |  |  |  |
| Disposal                          | P501 – Dispose of contents and container in accordance with all local,   |  |  |  |  |  |
|                                   | regional, national, and international regulations.   |  |  |  |  |  |
| Other hazards                     | Dilute azide-containing compounds in running water before discarding to avoid accumulation of potentially explosive deposits in lead or plumbing |  |  |  |  |  |
|                                   | copper.  |  |  |  |  |  |
|                                   | Sodium azide is rapidly absorbed through skin.   |  |  |  |  |  |

Unknown acute toxicity (GHS US) No data available

Full text of H-phrases: see section 16

Rev. 30-Apr-15

## **SECTION 3: Composition/information on ingredients**

Substance/MixtureMixtureOther Means of IdentificationNot available

**CAS Number/other identifiers** 

CAS Number Not applicable

| Ingredient Name | Product Identifier                             | Percentage |
|-----------------|--|------------|
| Sodium Azide    | (CAS No.) 26628-22-8 / [EINECS(EC#)] 247-852-1 | 0.1%       |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8

### SECTION 4: First aid measures

Description of first aid measures

First-aid measures general Never give anything by mouth to an unconscious person. If you feel unwell, seek

medical advice. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a

collar, tie, belt or waistband.

First-aid measures after eye contact Immediately flush eyes with plenty of water, occasionally lifting the upper and

lower eyelids. Check for and remove any contact lenses. Continue to rinse for at

least 10 minutes. Get medical attention if irritation occurs.

**First-aid measures after inhalation** Remove victim to fresh air and keep at rest in a position comfortable for

breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs,

provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately.

Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or

waistband.

First-aid measures after skin contact Flush contaminated skin with plenty of water. Remove contaminated clothing

and shoes. Get medical attention if symptoms occur. Wash clothing before

reuse. Clean shoes thoroughly before reuse.

First-aid measures after ingestion Wash out mouth with water. Remove dentures if any. Remove victim to fresh

air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. If necessary, call a poison center or physician.

Most important symptoms and effects, acute and delayed

Potential acute health effects

Eye contact
Inhalation
No known significant effects or critical hazards

Ingestion May be harmful if swallowed.

Over-exposure signs/symptoms

Eye contact No specific data

Rev. 30-Apr-15

InhalationNo specific dataSkin contactNo specific dataIngestionNo specific data

#### Indication of any immediate medical attention and special treatment needed, if necessary

Notes to physician Treat symptomatically. Contact poison treatment specialist immediately if large

quantities have been ingested or inhaled.

Specific treatments No specific treatment.

Protection of first-aiders No action shall be taken involving any personal risk or without suitable training. It

may be dangerous to the person providing aid to give mouth-to-mouth

resuscitation.

## **SECTION 5: Firefighting measures**

**Extinguishing media** 

Suitable extinguishing media Use an extinguishing agent suitable for the surrounding fire.

Unsuitable extinguishing media None known

**Special hazards arising from the substance or mixture** In a fire or if heated, a pressure increase will occur and the

container may burst.

Hazardous thermal decomposition products

No specific data

**Special protective actions for fire-fighters**Promptly isolate the scene by removing all persons from the

vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

**Special protective equipment for fire-fighters**Fire-fighters should wear appropriate protective equipment

and self-contained breathing apparatus (SCBA) with a full

face-piece operated in positive pressure mode

#### **SECTION 6: Accidental release measures**

#### Personal precautions, protective equipment and emergency procedures

**General measures**: This product contains a material of biological origin. Use universal precautions during clean up procedures. Avoid breathing (vapor, mist). Use only in a well-ventilated area. Handle in accordance with good industrial hygiene and safety practice. Use personal protective equipment, see section 8.

#### For non-emergency personnel

No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

#### For emergency responders

If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non- emergency personnel".

#### **Environmental precautions**

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Rev. 30-Apr-15

#### Methods and material for containment and cleaning up

**Small spill:** Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill: Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product.

#### Reference to other sections

See Section 1 for emergency contact information, Section 13 for waste disposal, and Section 8 for exposure controls and personal protection.

## **SECTION 7: Handling and storage**

#### Precautions for safe handling

**Precautions for safe handling:** This product should be handled as though capable of transmitting infectious diseases. Universal precautions should be followed when using this product. Put on appropriate personal protective equipment (see Section 8). Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

**Hygiene measures:** Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

#### Conditions for safe storage, including any incompatibilities

**Technical measures:** Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials. (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. Recommended storage temperature: 2 - 8°C

# **SECTION 8: Exposure controls/personal protection**

#### **Control parameters**

| USA NIOSH                 | NIOSH REL (TWA) (mg/m³) | Absorbed through skin. Notes NaN <sub>3</sub> CEIL: 0.3 mg/m <sup>3</sup> , (NaN <sub>3</sub> )       |  |  |  |
| USA NIOSH                 | NIOSH REL (TWA) (ppm)   | Absorbed through skin. Notes As HN <sub>3</sub> CEIL: 0.1 ppm, (as HN <sub>3</sub> )                  |  |  |  |
| USA OSHA                  | OSHA PEL (TWA) (mg/m³)  | Absorbed through skin. Notes as NaN <sub>3</sub> CEIL: 0.3 mg/m <sup>3</sup> , (as NaN <sub>3</sub> ) |  |  |  |
| USA OSHA                  | OSHA PEL (TWA) (ppm)    | Absorbed through skin. Notes as HN <sub>3</sub> CEIL: 0.1 ppm, (as HN <sub>3</sub> )                  |  |  |  |

#### **Exposure controls**

Appropriate engineering controls

Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

Environmental exposure controls

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Rev. 30-Apr-15

Personal protective equipment Protective goggles, gloves

Hand protection Chemical-resistant, impervious gloves complying with an approved standard should

be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

Body protection Impervious clothing. Personal protective equipment for the body should be

selected based on the task being performed and the risks involved and should

be approved by a specialist before handling this product.

Other skin protection Appropriate footwear and any additional skin protection measures should be

selected based on the task being performed and the risks involved and should

be approved by a specialist before handling this product.

Eye protection Safety eyewear complying with an approved standard should be used when a

risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety

glasses with side-shields.

Respiratory protection Where risk assessment shows air-purifying respirators are appropriate use a

full-face respirator with multi- purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the

respirator is the sole means of protection, use a full-face supplied air respirator.

Use respirators and components tested and approved under appropriate

government standards such as NIOSH (US) or CEN (EU).

Conditions to avoid No specific data Incompatible materials No specific data

Hazardous decomposition products

Under normal conditions of storage and use, hazardous decomposition

products should not be produced.

Other information When using, do not eat, drink, or smoke. May contain material of animal origin.

# **SECTION 9: Physical and chemical properties**

#### Information on basic physical and chemical properties

**Appearance** 

Physical state : Liquid

Color : Light yellow-green to dark yellow

Odor: Not availableOdor threshold: Not available

pH : ≈7.4

Melting point : Not available
Boiling point : Not available
Flash Point : Not available
Burning time : Not applicable
Burning rate : Not applicable
Evaporation rate : Not available

Other information

No additional information available

## **SECTION 10: Stability and reactivity**

**Reactivity**No specific test data related to reactivity available for this product or its

ingredients.

**Chemical Stability** The product is stable.

**Possibility Of Hazardous Reactions** Under normal conditions of storage and use, hazardous reactions will not occur.

**Conditions To Avoid** No specific data.

**Incompatible Materials** Acids, metals, water. (Note: Over a period of time, sodium azide may react with copper, lead,

brass, or solder in plumbing systems to form an accumulation of HIGHLY EXPLOSIVE

compounds of lead azide and copper azide.)

not be produced.

# **SECTION 11: Toxicological information**

#### Information on toxicological effects

Acute toxicity

| Product/ingredient | Result    | Species | Dose     | Exposure |
|--------------------|-----------|---------|----------|----------|
| Sodium Azide       | LD50 Oral | Mice    | 27 mg/kg | -        |
|                    | LD50 Oral | Rat     | 45 mg/kg | -        |

Conclusion/Summary: To the best of our knowledge, the toxicological properties of this product have not been

thoroughly investigated.

Skin corrosion/irritation:No data availableSerious eye damage/irritation:No data availableRespiratory or skin sensitization:No data availableGerm cell mutagenicity:No data available

#### Carcinogenicity:

| Product/ingredient name | Result                  | Species | Dose       | Exposure            |
|-------------------------|-------------------------|---------|------------|---------------------|
| Sodium Azide            | Equivocal - Oral - TD   | Rat     | 5460 mg/kg | 78 weeks Continuous |

Rev. 30-Apr-15

Other adverse effects

An environmental hazard cannot be excluded in the event of unprofessional handling or disposal. Very toxic to aquatic life with long lasting effects.

## **SECTION 13: Disposal considerations**

#### **Disposal methods**

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

# **SECTION 14: Transport information**
