

**Biotech Trading Partners®**

## **QnE Hyaluronic Acid ELISA Assay**

**Catalog# BTP-96200**

**For Research Use Only**

- *Not Species Specific*
- Marker for inflammation in peritoneal dialysis patients
- Marker for hepatotoxicity
- Toxicological and efficacy studies in drug development
- Basic research on liver sinusoidal endothelial cell function
- Measuring HA production in cell cultures: yeast, tumor cells, bacterial, various tissue cultures
- Development of nutritional supplements
- Cosmetic/skin care product development

## **QnE Hyaluronic Acid ELISA Assay**

**Catalog# BTP-96200**

This Research Use Only assay is:

1. *Not species specific*; can be used in both human and animal studies.
2. Includes a set of 6 reference solutions that are used to generate a reference curve against which the specimen concentration is determined.
3. Includes a set of known control sera to insure the validity of the run
4. Three incubation periods (60, 30, 30 minutes) and all testing is performed at room temperature
5. None of the components are light sensitive; no special precautions need to be taken
6. All reagents, except distilled water, are included in the kit
7. A 1-year shelf life from the date of manufacture. All reagents, opened or unopened, are stable through the entire expiration dating of the kit.
