The PRIMATE-ONE Family of Products

PRIMATE-ONE ELISA (48 Tests / Kit)

- 4810 B-Virus
- 4811 SIV, Simian Immunodeficiency Virus
- 4812 SRV, Simian Retrovirus groups 1-5
- 4813 STLV, Simian T-Lymphotropic Virus-1,2
- 4814 Measles Virus

SIMIAN-SPOT (8 Tests / Kit)

SIMIAN-SPT5

The SIMIAN-SPT5 assay will simultaneously detect, and give discreet answers, to B-Virus; Measles; SIV; SRV, and STLV in Simian Serum. Visual results are ready in under 70 minutes.

Custom kit configurations and bulk packaging options are available

All PRIMATE-ONE assays are for Research Purposes Only

Additional products are under development, so check back often at www.primatone.com

Biotech Trading Partners®

Using our experience in the development and manufacture of the SMART product line, Biotech Trading Partners is proud to announce

PRIMATE-ONE®

Primate-One is a comprehensive Simian Serology Program that allows the end-user to tailor a program to fit the facility's screening needs.

PRIMATE-ONE has two product groups:

PRIMATE-ONE ELISA is a traditional ELISA assay performed at room temperature in under 70 minutes. **PRIMATE-ONE ELISA** allows for high volume testing on a single analyte.

SIMIAN-SPOT (Simian Panel Test) is a simple, easy-to-use, multiple analyte assay. The SPOT test will give simultaneous results to 5 discreet markers in 70-minutes without the need for any specialized equipment. The reacted strips can be stored as a permanent record.

*All PRIMATE-ONE assays are designed for research use only. These assays are not for use with human sera and are for simians over 6-months of age. **PRIMATE-ONE kits do not contain any component, product, or by-product from any species protected by the Convention on International Trade in Endangered Species (CITES).***
