Click Chemistry Tools and Fluoroprobes Integration into Vector Laboratories

Dear Valued Partner,

In March of 2023, Vector Laboratories (Newark, California) acquired Click Chemistry Tools and Fluoroprobes (Scottsdale, Arizona). Our goal is to fully integrate these companies into our business operating systems and our website, to provide our customers with a seamless experience in ordering through a central system and process. Integration also enables us to drive optimal performance by tracking all aspects of production, logistics, and financials.

I wanted to inform you that our next phase of integration is merging the separate Click Chemistry Tools and Fluoroprobes websites into our Vector Laboratories website (www.vectorlabs.com) on **October 20, 2023**. This will provide a one-stop location for product information, and I will send out an additional reminder during the week of October 16th.

We value our relationship with you, and we thank you for your patience as we perform these activities. If you have any specific questions or would like to discuss the integration timeline further or experience issues with service levels, please do not hesitate to contact me directly.

Thank you,

A handwritten signature in black ink, appearing to read 'Kenny Drew', written over a horizontal line.
