Horizontal Electrophoresis System (BL-SPGT)

The Biolinkk Horizontal Electrophoresis System (Model BL-SPGT) is a compact and efficient unit designed for laboratory experiments. It ensures stable pH, easy maintenance, and safety, making it ideal for DNA and RNA gel electrophoresis.

Highlights

- ◆ Compact 200×200mm; 200×150mm; 200×100mm gel size for efficient nucleic acid separation.
- ◆ Stable pH and cooling effects with a 1800 ml buffer volume.
- ◆ Transparent lid with auto-switch-off for safety.
- ◆ Easy maintenance with unfoldable electrodes and color-coded tray.

The Biolinkk Horizontal Electrophoresis System, Model BL-SPGT, offers precision and reliability in nucleic acid separation. With a gel size of 200×200mm; 200×150mm; 200×100mm and a buffer volume of 1800 ml, it provides a consistent cooling effect and stable pH throughout the experiment. The system features a transparent top lid to prevent liquid volatilization and ensures safe operation with an auto-switch-off mechanism when the lid is removed. The unfolded electrode design allows for easy repairs and part replacements, while the colored tray background facilitates the convenient addition of samples. This system is ideal for routine DNA and RNA gel electrophoresis applications in molecular biology labs.

Features

- ◆ Gel Size: 200×200mm; 200×150mm; 200×100mm.
- ◆ Buffer Volume: 1800 ml for optimal cooling and pH stability.
- ◆ Transparent top lid to prevent liquid evaporation and electricity leakage.
- ◆ Auto-switch-off safety feature when lid is removed.
- ◆ Unfolded electrodes for easy repair and part replacement.
- ◆ Sample background color design for ease in adding samples.
- ◆ With the fluorescent ruler on the tray, can be observed directly.

Specifications

Cat. No.	BL-SPGT
Gel Size (W×L)	200×200mm; 200×150mm; 200×100mm
Sample volume	17, 22, 36, 44.
Buffer Volume	1800ml
Dimension (L×W×H) mm	397×230×93
Net weight	3.3 (kg)

Add: Third Floor, Plot No. 25, Community Centre, Block B-1, Janakpuri, Delhi-110058
